Software Engineer • ServiceNow Developer • Cloud & Automation

Tucker, GA • (762) 436-8030 • nafisahoque@gmail.com • linkedin.com/in/nafis-hoque • nafis-hoque.github.io/portfolio • github.com/nafis-hoque

PROFESSIONAL EXPERIENCE

Amdocs Inc.

Software Engineer / ServiceNow Developer

Alpharetta, GA

Oct 2021 – Present

- Developed and maintained **ServiceNow ITSM and ITOM workflows** supporting AT&T fiber activation, reducing average incident resolution time by **25%** through automation of repetitive L1/L2 tasks.
- Automated migration of **100K+ network device records** into ServiceNow CMDB using scheduled Import Sets and Transform Maps, improving asset data accuracy by **40%** and reducing reconciliation errors.
- Built and maintained **REST integrations** between ServiceNow and downstream provisioning systems using Scripted REST APIs and IntegrationHub spokes, eliminating several manual handoff steps across teams.
- Developed **Java Spring Boot microservices** exposing REST APIs consumed by ServiceNow and network provisioning workflows; services containerized with Docker and deployed to AWS.
- Contributed to **ServiceNow Virtual Agent and Now Assist** implementations, authoring NLU topics and conversation flows to deflect routine IT support requests.
- Wrote Business Rules, Script Includes, Flow Designer flows, and client scripts across incident, change, and problem management modules; maintained **GitLab CI** pipelines for ATF and scoped app deployments.
- Resolved **200+ Jira tickets** spanning distributed systems, APIs, and ServiceNow with **95% on-time delivery**; received **Cloud Systems Excellence Award – AT&T GigaPower Project** (Sep 2024).

Alor Wellness

Technical Lead (Contract)

Remote

Sep 2025 – Mar 2026

- Led front-end development on a **pre-launch healthcare platform** offering at-home testing, virtual care, and nationwide treatment access; built features using **Next.js, React, and TypeScript**.
- Built a full patient dashboard handling **sensitive PHI** including case status, prescription history, and biomarker results; consumed **third-party telemedicine and lab APIs** to surface real-time patient data with secure, role-based access controls.
- Integrated **third-party telemedicine APIs** handling webhooks and case lifecycle events across sandbox and production environments.
- Drove **migration of front-end functionality from Squarespace** to a custom application, improving maintainability and enabling feature velocity.

Handshake

AI Specialist (Part-Time)

Remote

Jan 2026 – Present

- Review and quality-assess model outputs for **AI training datasets**; provide structured feedback used in RLHF pipelines for LLM and computer vision model improvement.

JHMM Services LLC

Software Engineering Intern

Atlanta, GA

Jun 2020 – Aug 2020

- Developed **Java backend utilities** to validate and process **10,000+ customer records daily**, reducing manual correction effort and improving downstream data quality.

PROJECTS

ServiceNow CMDB Reconciliation Toolkit

Python, ServiceNow Table API, AWS Lambda

2025

- Built a lightweight Python tool that queries ServiceNow CMDB via REST API and flags stale or duplicate CI records; deployed as an AWS Lambda function on a scheduled basis to support data hygiene workflows.

Smart Home Automation System

Go, Java, AWS IoT Core, REST APIs

2024

- Designed a rule-based home automation backend in Go and Java that interfaces with AWS IoT Core device shadows to adjust thermostat schedules based on occupancy patterns and time-of-day logic.

EDUCATION

Georgia State University

Bachelor of Science in Computer Science, *Magna Cum Laude*

Atlanta, GA

May 2021

CERTIFICATIONS

AWS Solutions Architect – Associate • ServiceNow Certified System Administrator (CSA) • SAFe 5 Practitioner

TECHNICAL SKILLS

ServiceNow

ITSM, ITOM, CMDB, Flow Designer, Business Rules, Script Includes, Scripted REST APIs, IntegrationHub, Virtual Agent, Now Assist, ATF, Scoped Apps

Languages

Java (Spring Boot), Go, Python, JavaScript, C++, Bash

Cloud & DevOps

AWS (Lambda, ECS, IoT Core, CloudWatch, S3, RDS), Docker, Kubernetes, Terraform, Ansible, GitLab CI/CD, GitHub Actions

Databases

PostgreSQL, MongoDB, MySQL, Redis

Tools & Practices

REST APIs, Microservices, Agile (SAFe), ITIL, Git, PagerDuty, Jira, DevSecOps
